The Polynesian.
FOREIGN NEWS!

By the arrival of the clipper ship *Fortuna*, Capt.
Scudder, in 14 days from San Francisco, we
have received full news from America and Europe.
San Francisco Dec. 4, New Orleans Nov. 12, New
York Nov. 6, Liverpool Oct. 23.

We make the following summary:
The Atlantic Telegraph Cable.

A despatch from Valencia reached London on the
night of the 20th, stating that intelligence
signals were again being received from Newfoundland
land through the cable. The signals were very
distinct, and the words received were "Daniels
is in circuit." Authority was at once given to
use the Daniells battery likewise at Valencia.

In his letter to the press announcing the gratifying
fact, Mr. Seward, the Secretary of the company,
says, "This, however, though encouraging,
must not be regarded as a permanent state of
things, as it is still clear there is a serious fault
in the cable, while at the same time it is not at
present absolutely clear that any except the most
extraordinary and to the cable dangerous efforts
can be made, more especially on this side, to over-
come the existing obstacles in the way of perfect
working."

It is said that the company will probably send
out one of Huley's new and powerful electric
machines to Newfoundland.

The London Times says that all appearances
indicate that the present cable must be given up,
and hopes that the experience gained will be used
to insure that success which is finally certain. It
admits the great superiority of the Niagara over
the Agamemnon, and thinks ships should be spe-
cially constructed for laying cables.

On the subject of the Central American ques-
tion, the *New York Herald* gives vent to its pique
in the following, which whether intended as sim-
ply a threat or as a foreshadowing of coming
events is significant enough of the spirit that
prompts it:—

**Combined Action of England and France
in the Central American Imbrolio.**

Our Washington despatches, published this
morning, are of the highest importance. They
announce that England and France have united
in addressing a note to our government, of an im-
perative character, taking ground in favor of
carrying out the convention between Costa Rica
and Nicaragua, under which M. Felix Bello and his
associates are to construct an interoceanic canal,
and calling upon the United States, under the
provisions of the Clayton-Bulwer treaty, to unite
with them in maintaining inviolate the neutrality
of the Isthmus. We are inclined to place con-
fidence in this information, as it obtains ample
corroboration, not only from the tone of the recent
articles in the London and Paris papers which are
regarded as the organs of the Government, but al-
so from the letter of Lord Malmesbury to M. Bello,
in which the English Secretary declares that
the stipulations of the treaty between Great
Britain and the United States of the 19th April,
1850, commonly called the Clayton-Bulwer treaty,
will, in my opinion, apply to this scheme (Bello's
projected canal) if carried out.

It is already sufficiently evident that the back-

ing and filling of the Nicaragua government and
its Minister, Senor Jerez, upon the subject of the
Cass-Yrisarri treaty, was a part of the general
policy adopted for the purpose of giving time to
perfect the understanding with the English and
French governments, the announcement of which
is now made. What the organs of those govern-
ments chose to designate as the aggrandizing
spirit of the United States is to be checked, and
henceforth we are to be called upon to play a se-
condary part in shaping the destinies of the con-
tiguous States, the dominant power being con-
sidered in the hands of that European alliance
which we were warned, three years ago, had in
view not only the regulation of the affairs of the
Old World, but also of the New. This Anglo-
French alliance, having carried out the first por-
tion of its programme, is now, according to our
information, prepared to enter upon the second
act; and whilst the Cabinet at Washington is ad-
vised of the ultimatum arrived at, the fleets of the
combined Powers are on their way to give phys-
ical effect to the fiat which has gone forth.

I send you every confidence in the courage and
capacity of the President to meet the occasion as
it deserves. The presence of the combined fleets
in the waters of Central America can have no ef-
fect in coercing the United States into a position
other than that she might see fit voluntarily to as-
sume. Whatever rights our citizens may have
must be protected at all hazards; nor can we per-
mit England and France to go one step beyond
that point which affects our safety or our honor.

But it cannot be concealed that the time has ar-
rived when a practical solution must be had of the
delicate subjects which surround this Central
